The Login ID should be automatically generated by the system in the following format:
[OI (First two letters of the employee's first and last name) (year of joining) (serial number of joining)]

Example: OIJOBO20220001

Explanation:

OI → Odoo India (Company Name)

JOBO → First two letters of the employee's first name and last name

2022 → Year of Joining

0001 → Serial Number of Joining for that Year

Note

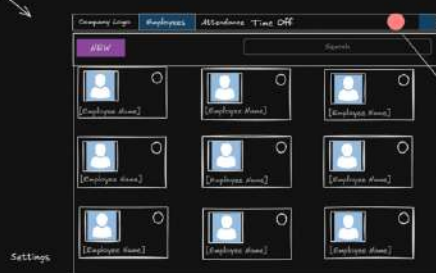

- Normal user cannot register, so when the HR officer or Admin creates a new user/employee, there ID should also be created with this method.

- There password should be auto generated for the first time by the system.

- They can login and change the system generated password.

Make these cards clickable, and on click, the employee information page should open in a view-only (non-editable) mode.

After login the user must land on this page

Each card should display the employee's profile picture and some basic information.

At the top-right corner of each card, there should be an icon indicating the employee's attendance or work status.

The status indicators are as follows:

● Green dot: Employee is present in the office.

⌘ Absence icon: Employee is on leave.

● Yellow dot: Employee is absent. (Employee has not applied time off and is absent.)

User Profile Picture (Avatar)

My Profile
Log Out

The "My Profile" option opens the employee's profile in form view.

Clicking the profile picture (avatar) should open a dropdown menu with options: My Profile, and Log Out.

Check In ->

Upon successful Check IN, the red status dot changes to green.

Check Out ->

Employees can mark their attendance using the Check In/Check Out system, and users can view their attendance records through the Attendance module.

12.00

%

PF is calculated based on the basic salary

Tax Deductions

Professional Tax

200.00

₹ / month

Professional Tax deducted from the Gross salary

Important

The Salary Information tab allows users to define and manage all salary-related details for an employee, including wage type, working schedule, salary components, benefits. Salary components should be calculated automatically based on the defined Wage.

- Wage Type

Fixed wage.

- Salary Components

Section where users can define salary structure components.

Each component should include:

Basic, House Rent Allowance, Standard Allowance, Performance Bonus, Leave Travel Allowance, Fixed Allowance

Computation Type: Fixed Amount or Percentage of Wage

Value: Percentage field (e.g., 50% for Basic, 50% of Basic for HRA, Standard Allowance 4167, Performance Bonus 8.33%, Leave Travel Allowance 8.33%, Fixed allowance is = wage - total of all the component)

Salary component values should auto-update when the wage amount changes. The total of all components should not exceed the defined Wage

- Automatic Calculation:

The system should calculate each component amount based on the employee's defined Wage.

Example:

If Wage = ₹50,000 and Basic = 50% of wage, then Basic = ₹25,000.

If HRA = 50% of Basic, then HRA = ₹12,500.

Each fields for configuration (e.g., PF rate 12%), and Professional Tax 200

This view opens when the employee accesses their "My Profile."

NOTE

If the employee's working source is based on the assigned attendance

On the Attendance page, users should see a day-wise attendance of themselves by default for ongoing month, displaying details based on their working time, including breaks.

For Admins/Time off officers: They can see attendance of all the employees present on the current day.

Attendance data serves as the basis for payslip generation.

The system should use the generated attendance records to determine the total number of payable days for each employee.

Any unpaid leave or missing attendance days should automatically reduce the number of payable days during payslip computation
